

VANES AND GASKET KITS FOR VACUUM PUMPS

Since the beginning of its own activity FILTER TECHNICS dedicated to the vanes for vacuum pumps a special attention. In order to grant an high quality level It is important that they are made of the same materials as original, for their full interchangeability.

At the meantime continue the work to improve further on the quality and duration.

The materials used are carbon fibre, kevlar and plastic. The range covers most of market demands (Rietschle, Becker, Busch, Leybold and Orion). Upon request, it's possible to produce vanes on drawing.

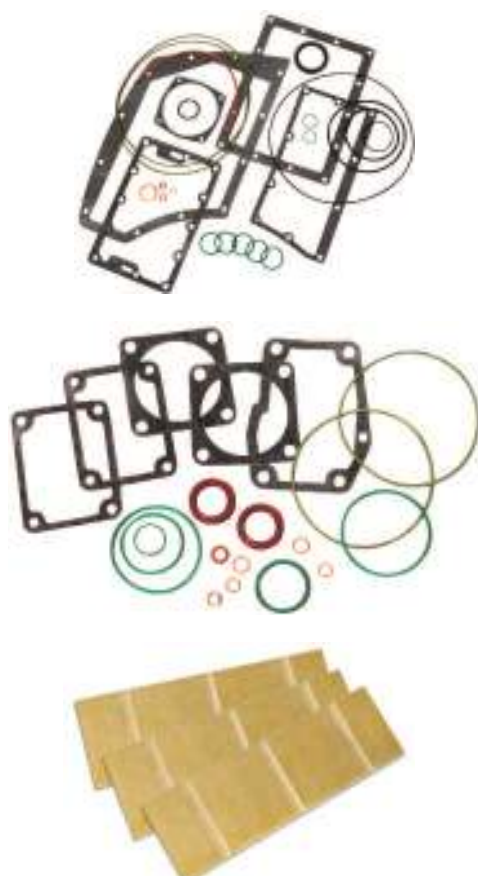

As regards the gasket kits, they are mainly made in viton and can replace all parts liable to wear in a pump.
